

Adults and children may suffer life-threatening emergencies outside a hospital. These emergencies include respiratory arrest (no breathing), choking and cardiac arrest, (heart stopping). Most of these emergencies occur in or near the home. Victims of these emergencies are more likely to survive if **YOU** provide **CPR**.

American Heart Association Training

All courses are according to the American Heart Association guidelines and certification is valid for two (2) years.

LifeSavers has over 20 years of teaching experience and is a designated training center with the American Heart Association with 200 certified instructors aligned.
